## 1. Introduction

In deliverable 2.1 networks and key actors in the regions were identified by the partners representing the four regions participating in the project. A list of regional networks and regional actors are attached to this document.

Networks and actors in these four regions are considered:

- North East of England, United Kingdom,
- Emscher-Lippe, Germany,
- Umbria, Italy,
- Pojezierze Gostynińsko-Włocławskie, Poland

North East England: Four main networks for bioenergy exist, characterized by a strong participation of public and private sectors. It is predominantly shaped by energy producers, energy utility companies, NGOs and SME.

Emscher-Lippe, Germany: Most of the activities are project based and are carried out as informal cooperation. There are numerous highly committed actors in the field of bioenergy. A strategic network does not exist in the region.

Umbria, Italy: In this region no networking activities in the bioenergy field are carried out. There is a huge potential of cooperation with strategic actors in the area of biomass production, local administration and energy utility companies SME and scientific institutions.

Pojezierze Gostynińsko-Włocławskie, Poland: No network dedicated to biomass utilisation exists. Stowarzyszenie plays a major role in the promotion of activities in the region. The key actors are the local administration players that are interested in the biomass production, with a good support from NGOs operating on national scale and SMEs. There is a potential interest among the farmers as biomass producers.

On the basis of the survey the conclusion can be made that all regions represent immense potential for bioenergy cooperation and networking aimed at elevating the scope and efficiency of biomass use in the regions.

## 2. Country: UK

Region: North East of England

### 2.1. List of biomass networks in the region

- 1) Biomass Forum
  - Main biomass network, specifically focused on biomass issues in the NE of England;
- 2) NREG (Northumberland Renewable Energy Group)
  - A Northumberland county network active in the area of all renewable energy sources, not only biomass only on a county level; interested in adoption of renewable energy;
- 3) NEWFuels (North East Woodfuels)
  - Biomass producers group / network, also an actor on broader scale in the NE of England,
- 4) CoRe (community Renewable Energy)
  - A Social Enterprise supporting communities interested in adoption of renewable energy.

### 2.2. List of actors in the region
